COAL PREPARATION PLANT SUPERINTENDENT

Trinidad, CO, USA. Operations Based.

Reporting to the Manager – Colorado Operations you will be accountable for the safe operational management of the Coal Handling Preparation Plant to achieve the safety, production, operational and quality budgets and targets set. You will achieve this through the careful monitoring and management of the maintenance and operational activities of the plant on day-to-day basis

You will set high standards for the site's production targets through efficient and safe plant activities. Through your previous experience in process management in a similar position you will know exactly what activities are required to achieve maximum availability of plant and equipment. Your effective interpersonal and influential skills will ensure you develop and promote strong and ongoing relationships with internal and external stakeholders and contractors.

We are seeking a credible, decisive and achievement oriented leader who will be a role model for safe work practices and an achievement oriented work culture.

To be successful in this role, you will have at least 10 years previous CHPP and Crushing Plant Supervising experience.
