### PRODUCTION SUPERINTENDENT

*SNR currently holds a vacancy for an experienced Production Manager at its **Underground Operation**, located at Trinidad, Colorado, USA.*

An opportunity exists for an experienced Production Superintendent to join the SNR Colorado Management Team. Reporting to the General Manager – Colorado Operations, this role will focus on leading the Production teams to meet or exceed annual planned tons and development driveage with an emphasis on safety, teamwork and costs management.

Your key focus in this position will be to develop and drive the planning and scheduling of production whilst meeting statutory compliance requirements pertinent to underground mining. You will set high standards for the production areas, and manage projects within budget and that are consistent with the Management Operating Systems (MOS).

Your strong interpersonal and influential skills will ensure you maintain and promote effective relationships with internal and external stakeholders.

To be successful in this role you will have a minimum of 5 years leadership experience, the requisite technical expertise and a proven record in implementing improved production strategies. You must hold a certification for UG Mine Foreman Tertiary qualifications in Mining Engineering or related discipline and Mines Rescue Certification, whilst not essential, will be highly regarded.

Please email your application to [info@snresources.com](mailto:info@snresources.com).
